

# Art Acquisitor

Fall/Winter 2006-edition

The Caribbean 36" x 36" Acrylic on canvas

## Santina

Sublime and cerebral, utilizing an expressionistic freedom of brushstroke and an intuitive sense of balance, Canadian artist Santina creates emotional, abstract visions resonating with luminous light and diaphanous color. These are works of visual poetry, reflecting her intriguing personal vision, which translated majestically into her art.

Marvelous hues in her vivid, radiant paintings are perfectly orchestrated, whether they are complementary colors or subtle variations of one segment of the color wheel.

In her richly complex art, the abstract forms appear to be layered, shape upon shape, color upon color, until the perfect harmony of color and form have been achieved. Her gifted sense of color creates a visceral experience of profound emotions. Intuitive

and ardent, Santina's paintings are born from the instinct to create art from the heart, reflecting meaningful statements about the joys and perils of life. Enveloping a great range of both passionate and serene colors, her art is a personal narrative comprised of uninhibited forms, gorgeous color, sophisticated lines, and radiant light. Her unique voice and singular vision reveals an artist's quest for harmony and equilibrium in the world around us. These abstracts, rich, atmospheric canvases are poetic tombs of the heart, fluidly imparting a freedom of emotion. Defined feelings of the heart are revealed in abstract form, creating an immediate sensory experience between the viewer and Santina's art, thus revealing paintings that are metaphors for life's experiences. Her art is imbued with and underlining passionate narrative that reveals itself in a lyrical and expressive aesthetics.
